

## Major Updates: Faster Estimating & Better Organization

We've been working hard behind the scenes. Today, we're excited to announce powerful new features for Contractor Toolbox that will transform how you handle commercial roofing estimating and reporting. These updates focus on three key areas: saving you time, improving precision, and keeping your projects organized. From flexible drawing tools to enhanced documentation capabilities, every feature is designed to make your workflow smoother and more efficient.

### Drawing & Pitch Control

Update drawing scales after systems are drawn and set individual roof system pitch for accurate material take-offs

### Duplicate

Duplicate surveys and deficiencies with control, plus instantly swap materials across all related items

### Job Completion Report

Generate professional Job Completion Reports with after photos and upload PDF reference documents for deficiencies

### Smart Organization

Store customer documents centrally and copy dynamic tags effortlessly into your proposal notes

Along with these new features, we've fixed a number of bugs to improve stability.

---

## What's Next for Contractor Toolbox

We are currently in a development cycle focused on improving Contractor Toolbox's capabilities and ease of use. We are working to determine the next steps in program changes and improvements based on user feedback.

- ☐ **Ready to explore?** All these features are available now in your Contractor Toolbox account so please check them out! Happy estimating from the entire team!
